

- ① Start with your paper hot dog style. Using a pencil, divide your paper into 2 rows of 3 cells (6 equal cells). Make these lines light - you will be erasing them later. The top row will be cells 1 to 3 while the bottom row will be cells 4 to 6.
- ② In the 1st cell, draw a cat entirely out of triangles.
- ③ In the 2nd cell, draw the Earth and shade in the water regions without taking your pencil off of the paper.
- ④ In the 3rd cell, draw spades, hearts, clubs, and diamonds, alternating between them in that order. Keep going until the total number of these symbols is the same as the number of days in your birthday month.
- ⑤ In the 4th cell, find an item near you and draw it with your eyes closed.
- ⑥ In the 5th cell, draw a tree with your non-dominant hand.
- ⑦ In the 6th cell, draw a snowman upside down. Do not rotate the page to draw it the right side up. The snowman should at least have a top hat, a carrot nose, a scarf, and two stick arms.
- ⑧ Finally, erase the lines that you made in Step 1.
